KEY WORDS: Coleoptera, Carabidae, Brachininae, *Stenaptinus*, lectotype.
КЛЮЧЕВЫЕ СЛОВА: Coleoptera, Carabidae, *Stenaptinus*, лектотип.

ABSTRACT. Correct information on and digital images of the lectotype of *Stenaptinus fimbriatus* are given.

РЕЗЮМЕ. Приводятся уточнённые данные о лектотипе *Stenaptinus fimbriatus* и его фотография.

In reviewing *Stenaptinus* Maindron, 1906 from Vietnam Fedorenko [2021] resurrected *Stenaptinus fimbriatus* (Chaudoir, 1876) from junior synonyms of *S. javanus* (Dejean, 1825), but ambiguously designated lectotype of *S. fimbriatus*. He correctly mentioned in the ‘Comments’ to *S. fimbriatus* that he designated a syn-type from India as lectotype, but he wrongly indicated in the section ‘Material’ that the lectotype was female specimen from Java. To repair my mistake and prevent one from any further confusion I provide digital images of the lectotype and its original labels here.

The lectotype is a male specimen, with two, yellow, handwritten labels ‘Malabar.’ and ‘Fimbriatus. m/ In India orient.’, two printed labels ‘Ex Musaeo/ Chaudoir’ and ‘G. J. Arrow/ vidit 1901.’, and a handwritten label ‘javanus Dejean/ Java/ C. Dejean’ from the box with the lectotype (Museum National d’Histoire Naturelle, Paris). Slash on label means new line.

Acknowledgements. Once again my sincere thanks to Azadeh Taghavian-Azari (MNHN) for high-resolution images of the lectotype, with apologies for the confusion about it.
